

ZenWood™ Coatings

Your product starts with the finest wood.

Let ZenWood™ finish it. The pros at Hentzen Coatings understand the unique characteristics of wood. It goes beyond engineered solutions that merely protect, but also enhance the beauty of wood as never before. Regardless of color or chemistry, our formulations meet unique application processes with unsurpassed efficiency. Manufactured and shipped to exacting ISO9001 quality standards, and backed by more than 90 years of coatings experience, rest assured that Hentzen's ZenWood™ Coatings will reflect your brand richly.

We want to know your business.

From engineering to application to after-sale support, we have to understand your business. Doing so makes it possible to respond to requests that keep your production processes moving. This comprehensive approach to your needs is unequalled in the wood coatings industry, and made possible by associates who are committed to your unique business requirements. Highly trained and motivated sales, laboratory and field support specialists deliver with a nimble, adaptable approach that ensures smart and timely coatings solutions.

ZenWood™ Coatings are custom engineered for your automated application equipment and processes. Whether you're finishing flooring, architectural panels or other flat substrates with roll coaters, reverse fill machines and reciprocating sprayers or robotically spraying and curing three-dimensional parts with UV curing ovens, Hentzen Coatings has it covered.

Let us apply our experience.

What makes Hentzen exceptional? We're told it's our willingness to provide a coating matched perfectly to your needs. Our technical sales and field support personnel are leaders in onsite application with extensive training, from hand spray equipment through sophisticated automated finishing lines. For every wood coating need, we have a solution. From classic raw wood wiping stains and glazes to sophisticated UV-curable sealers and topcoats—and nearly everything in between—there's ZenWood.™

World-class facilities and solutions.

Best-in-class is taken seriously at Hentzen Coatings. A world-class combination of people, engineering facilities and state-of-the-art manufacturing processes have built a reputation second to none. Let us show you what that means for your product line and brand.

NITROCELLULOSE LACQUERS, SEALERS AND TOPCOATS

POLYURETHANE SEALERS AND TOPCOATS

POLYESTER SEALERS AND TOPCOATS

UV-CURABLE COATINGS: FILLERS, STAINS, SEALERS,
TOPCOATS AND UV OIL DESIGNED FOR SPRAY, VACUUM COAT,
MIST COAT, ROLL COAT, AND MORE

Wood finishes engineered specifically for aircraft interiors meet the unique flexibility demands of general aviation as well as OSU requirements for flame retardancy.

Hentzen's state-of-the-art formulation and research facilities enable innovation while offering accelerated and destructive laboratory testing capabilities. Onsite coating application and UV-curing equipment aid in formula and process development.

Operations in Wisconsin, Illinois, South Carolina and Florida, and global distribution ensure Hentzen's ZenWood™ Coatings are available to meet your production needs.

**The pursuit of perfection for more than 95 years.
Market driven. Customer focused. Quality unsurpassed.**

Headquartered in Milwaukee, Wisconsin since 1923, Hentzen Coatings, Inc. specializes in the development, engineering and manufacturing of liquid and powder coatings for aerospace, military and general industrial applications. Our coatings are custom engineered to perform in extreme conditions and are continually improved to meet exacting customer needs. Hentzen coating products exceed market-driven specifications and are manufactured in state-of-the-art facilities in Milwaukee, Wisconsin; Batavia, Illinois; Greenville, South Carolina; Clearwater, Florida; and through a joint venture partner in China. Distribution facilities in Mexico service Central and South America.
